1 [Fast detection of communication patterns in distributed executions](#)

Thomas Kunz, Michiel F. H. Seuren

 November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Full text available: pdf(4.21 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

2 [An architectural approach to building systems from COTS software components](#)

Mark R. Vigder, John Dean

 November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Full text available: pdf(253.02 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As software systems become increasingly complex to build developers are turning more and more to integrating pre-built components from third party developers into their systems. This use of Commercial Off-The-Shelf (COTS) software components in system construction presents new challenges to system architects and designers. This paper is an experience report that describes issues raised when integrating COTS components, outlines strategies for integration, and presents some informal rules we have ...

7 [Workshop report of OOGP'97, the first international workshop on object oriented groupware platforms](#)

Uwe von Lukas, Hermen J. van der Lugt, G. Henri ter Hofte

April 1998 **ACM SIGGROUP Bulletin**, Volume 19 Issue 1

Full text available:  [pdf\(535.81 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

The first international workshop on Object Oriented Groupware Platforms (OOGP'97) was held September 7, 1997, as a full day workshop at the ECSCW'97 conference in Lancaster, UK. During this day, 25 participants from Europe, the US and Australia - which were invited to the workshop based on position papers -- gathered to discuss the question: "What should an Object Oriented Groupware Platform look like and how do we get there from current state of the art?". The full workshop proceedings [...

8 [EDA and the network](#)

Mark D. Spiller, A. Richard Newton

November 1997 **Proceedings of the 1997 IEEE/ACM international conference on Computer-aided design**

Full text available:  [pdf\(231.39 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)
 [Publisher Site](#)

Digital computer networks are playing an increasingly important role in the evaluation, distribution, integration and management of EDA systems. Tools, libraries, design data, and a variety of both design and manufacturing services are accessible today via networks. Networks are also playing a central role in the integration of system design teams, teams that involve a variety of both business and technical disciplines as well as widely distributed geographical locations. Throughout the history ...
